Getting started with Samadhan

Set up your organization, join the right workspace, and keep requests moving.

Creating a workspace

- Organization admins: register your organization, verify your email, and become its first administrator.
- Invite customers or support teammates.

Joining a workspace

- Invited customers and teammates: use the invitation and the email address it was sent to.
- Do not register a second organization.

Already invited? Follow the invitation and sign-in instructions. If it is missing, expired, or not working, ask your administrator for a replacement.

SETUP PATH

Organization setup · four steps

1. **Register:** organization name, your name, email, and a password of at least 12 characters.
2. **Verify email:** enter the six-digit code. It expires in 10 minutes.
3. **Sign in:** use your registered email and password.
4. **Invite people:** in Workspace Access, choose a role. Invitations are valid for seven days.

Move support requests forward

A clear ticket helps the right person decide the next step.

TICKET LIFECYCLE

START	ACTIVE	DONE	END
Open	**In Progress**	**Resolved**	**Closed**
Awaiting work.	Being handled.	Completed state.	Completed state.

Not fixed? Reply with details of what remains.

CREATE

Create a useful ticket

- Write a specific subject; choose the closest category and priority.
- Describe what happened, what you expected, who is affected, and whether work is blocked.
- Include steps already tried and any error message.
- Keep contact details current; phone is optional and enables the WhatsApp link.
- Reply to the existing request instead of duplicating it; answer missing-information questions.

Roles and handoffs

- Support reviews subject, description, category, priority, status, and updates.
- Keep ownership and priority aligned to impact; ask one clear question at a time.
- When work is complete, summarize the outcome and set a completed status.

INSIGHT

Analytics and reports

- Search and filter tickets by details, status, or priority; review ticket activity.
- Admins: Analytics & Reports shows totals, status and priority, categories, and trends by date range.
- Export a ticket report with date, status, and priority filters.

Keep requests safe

- Never include passwords, verification codes, payment-card details, or other secrets.
- Share only what resolves the issue; remove unrelated personal or confidential data.
- Attach only files you are authorized to share. Do not share passwords or invitation codes.

Simple way to begin: create or join the right workspace, submit one clear request, and follow its updates. For account access, contact your administrator.
